

# **Estimates of the Aggregate Quarterly Capital Stock for the Post-War U.S. Economy**

Daniel Levy and Haiwei Chen

*Review of Income and Wealth*

Volume 40, No. 3, September 1994, pp. 317–349

## **Unpublished Supplementary Appendix**

The published version of the paper does not contain all the series we have actually constructed for the project. This unpublished supplementary appendix contains all 36 series (nominal and real, gross and net, CDG, PDG, and BS) we have constructed.

The notation used is as follows:

CDG = Consumer Durable Goods

PDG = Producer Durable Goods and Equipment

BS = Business Structures (Nonresidential)

If the series' name ends with 87, then it is in real terms, measured in 1987 dollars.

Otherwise it is in nominal terms.

To save space, the series in this appendix are presented in a format different from the published version. For example the series in the published version in column 1 of Table 1 is now displayed in column 2 of Table 3 of this appendix.

Table 1. Quarterly Gross Capital Stock, U.S., 1948–91, Linear Interpolation Technique  
(Method 1)

Time	CDG	CDG87	PDG	PDG87	BS	BS87
